No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1983 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 222

NUMBER 1, APRIL 1, 1983

INVITED PAPER

- Genetic Control of Replication of the Double-Stranded RNA Segments of the Killer Systems in *Saccharomyces cerevisiae* Reed B. Wickner 1

COMMUNICATION

- Transferase-Deficiency Galactosemia: Evidence for the Lack of a Transferase Protein in Galactosemic Red Cells Michael W. Andersen, Vincent P. Williams, George R. Helmer, Jr., Clifford Fried, and George Popják 326

BIOCHEMICAL GENETICS AND CELLULAR DIFFERENTIATION AND DEVELOPMENT

- The Alteration of Gene Expression in Rat Liver during Chemical Carcinogenesis Jen-Fu Chiu, Dao-Pei Huang, Anne L. Burkhardt, Gilbert Cote, and Charles E. Schwartz 310

BIOLOGICAL OXIDATION AND BIOENERGETICS

- Superoxide, Hydrogen Peroxide, and Oxygen Toxicity in Two Free-Living Nematode Species Janice Blum and Irwin Fridovich 35
- Partial Purification and Characterization of Two Soluble c-type Cytochromes from *Chromatium vinosum* Gary O. Gray, Dale F. Gaul, and David B. Knaff 78
- Reconstruction of Steady State in Cell-Free Systems. Interactions between Glycolysis and Mitochondrial Metabolism: Regulation of the Redox and Phosphorylation States Yaw-Shong A. Jong and E. Jack Davis 179
- Proton Coupling in the Ligand-Binding Reaction of Ferric Cytochrome P-450 from *Pseudomonas putida* Keiko Totani, Tetsutaro Iizuka, Hideo Shimada, Ryu Makino, and Yuzuru Ishimura 207
- Redox Potential Dependence of Photophosphorylation and Electron Transfer in Continuous Illumination of *Rhodopseudomonas sphaeroides* Chromatophores Willem H. van den Berg, Walter D. Bonner, Jr., and P. Leslie Dutton 299
- Net Adenine Nucleotide Transport in Rat Liver Mitochondria Is Affected by Both the Matrix and the External ATP/ADP Ratios Judith Austin and June R. Aprille 321

COENZYMES

- The Geometry of the Thioester Group and Its Implications for the Chemistry of Acyl Coenzyme A David E. Zacharias, Peter Murray-Rust, Robert M. Preston, and Jenny P. Glusker 22

ENZYME MECHANISMS AND METABOLISM

- Cystathionine β -Synthase from Human Liver: Improved Purification Scheme and Additional Characterization of the Enzyme in Crude and Pure Form Jan P. Kraus and Leon E. Rosenberg 44

Transient Kinetic Studies of Substrate Inhibition in the Horse Liver Alcohol Dehydrogenase Reaction	<i>Mitchell T. Kamlay and Joseph D. Shore</i>	59
Carnitine Octanoyltransferase of Mouse Liver Peroxisomes: Properties and Effect of Hypolipidemic Drugs	<i>Shawn O. Farrell and L. L. Bieber</i>	123
Formation of 3-(2'-Deoxyribofuranosyl) and 9-(2'-Deoxyribofuranosyl) Nucleosides of 8-Substituted Purines by Nucleoside Deoxyribosyltransferase	<i>Min-Chi Huang, John A. Montgomery, Martha C. Thorpe, Ellen L. Stewart, John A. Secrist III, and Raymond L. Blakley</i>	133
Demonstration of the Enzymatic Mechanisms of α -N-Acetyl-D-Glucosamine-1-Phosphodiester N-Acetylglucosaminidase (Formerly Called α -N-Acetylglucosaminylphosphodiesterase) and Lysosomal α -N-Acetylglucosaminidase	<i>Ajit Varki, William Sherman, and Stuart Kornfeld</i>	145
Pyruvate Kinase Catalyzed Phosphorylation of 3-Nitro-2-Hydroxypropionate by ATP and Concomitant Inactivation of the Enzyme	<i>David J. T. Porter, David E. Ash, and Harold J. Bright</i>	200
Interconversions between Different Sulfhydryl-Related Kinetic States in Glucokinase	<i>Peter S. Tippet and Kenneth E. Neet</i>	285

LIPIDS

The Effect of Aromatic CoA Esters on Fatty Acid Synthetase: Biosynthesis of ω -Phenyl Fatty Acids	<i>Stuart Smith and Alan Stern</i>	259
--	------------------------------------	-----

MEMBRANE STRUCTURE AND FUNCTION

Properties of Phosphatidylinositol Kinase Activities in Rabbit Erythrocyte Membranes	<i>Eugene E. Quist and Ronnie C. Barker</i>	170
Specific ^{13}C Reductive Methylation of Glycophorin A. Possible Relation of the N-Terminal Amino Acid and the Lysine Residues to MN Blood Group Specificities	<i>Robert E. Hardy, Ron L. Batstone-Cunningham, and Kilian Dill</i>	222
Membrane Receptors for <i>Vicia graminea</i> Anti-N Lectin and its Binding to Native and Neuraminidase-Treated Human Erythrocytes	<i>Marie Jose Prigent, Dominique Blanchard, and Jean-Pierre Cartron</i>	231

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

Surface-Charge Related Actions of Polylysine on Thylakoid Membranes	<i>Mark L. Richter and Peter H. Homann</i>	67
Interaction of Ribulose Bisphosphate Carboxylase/Oxygenase with 2-Carboxyhexitol 1,6-Bisphosphates	<i>Daniel J. W. Roach, Paul D. Gollnick, and Bruce A. McFadden</i>	87
Light-Dependent Proton Efflux from Chloroplast Thylakoids	<i>Marilyn S. Abbott and Richard A. Dilley</i>	95

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

Hydrodynamic Properties of Rat Hepatic Prolactin Receptors	<i>Barbara Rae-Venter and Thomas L. Dao</i>	12
--	---	----

POLYSACCHARIDES AND COMPLEX CARBOHYDRATES

- Heterogeneity of Proteoglycans in Monkey Corneal Stroma
Kiyoshi Nakazawa, John R. Hassell, Vincent C. Hascall, and David A. Newsome 105

PROTEIN STRUCTURE, FUNCTION, AND TURNOVER

- Dissociability of Enzyme- α_2 -Macroglobulin Complexes
Dalton Wang, Kuo Wu, and Richard D. Feinman 117
- The Dependence of the Molecular Dynamics of Calmodulin upon pH and Ionic Strength
R. F. Steiner, P. K. Lambooy, and H. Sternberg 158
- Differences in Iodinated Peptides and Thyroid Hormone Formation after Chemical and Thyroid Peroxidase-Catalyzed Iodination of Human Thyroglobulin
Carol Dziadik Turner, Steven B. Chernoff, Alvin Taurog, and Allen B. Rawitch 245
- Thrombin-Platelet Interactions: An Assessment of the Roles of Saturable and Nonsaturable Binding in Platelet Activation
Richard J. Alexander, John W. Fenton II, and Thomas C. Detwiler 266

PROTEIN SYNTHESIS

- Activity of *Euglena gracilis* Chloroplast Ribosomes with Procaryotic and Eucaryotic Initiation Factors
Mary C. Graves and Linda L. Spremulli 192

REGULATION OF METABOLISM AND OF ENZYME ACTION

- Aging-Related Decreases in Hepatic Mitochondrial and Cytosolic δ -Aminolevulinic Acid Synthase During Experimental Porphyria
Anthony W. Scotto, Ronald W. Rinehart, and Diana S. Beattie 150
- Vitamin K-Dependent Carboxylase: Effect of Detergent Concentrations, Vitamin K Status, and Added Protein Precursors on Activity
D. V. Shah, J. C. Swanson, and J. W. Suttie 216
- Isolation and Elucidation of Some Functional Properties of the "Mute" Catalytic Subunit of cAMP-Dependent Protein Kinase
Jennifer Reed, Michael Gagelmann, and Volker Kinzel 276

STRUCTURAL PROTEINS

- The Content of Elastin in the Uterine Cervix
Phyllis C. Leppert, Stephen Keller, Joseph Cerreta, Yvonne Hosannah, and Ines Mandl 53

NUMBER 2, APRIL 15, 1983

INVITED PAPER

- Three-Iron Clusters in Iron-Sulfur Proteins
Helmut Beinert and Andrew J. Thomson 333

COMMUNICATION

- Sustained Oscillations in a Reconstituted Enzyme System Containing Phosphofructokinase and Fructose 1,6-Bisphosphatase
Klaus Eschrich, Wolfgang Schellenberger, and Eberhard Hofmann 657

BIOCHEMICAL GENETICS AND CELLULAR DIFFERENTIATION AND DEVELOPMENT

- Conservation of the Acetylation Pattern of Histones and the Transcriptional Activity in Ehrlich Ascites Tumor Cells by Sodium Butyrate
Irmgard Multhaup, Adam Csordas, Hans Grunicke, Rudolf Pfister, and Bernd Puschendorf 497

BIOLOGICAL OXIDATION AND BIOENERGETICS

- Photoacoustic Spectroscopy of *Anacystis nidulans*. I. Effect of Sample Thickness on the Photoacoustic Signal
Robert Carpentier, Bernard Larue, and Roger M. Leblanc 403
- Photoacoustic Spectroscopy of *Anacystis nidulans*. II. Characterization of Pigment Holochroms and Thermal Deactivation Spectrum
Robert Carpentier, Bernard Larue, and Roger M. Leblanc 411

ENZYME MECHANISMS AND METABOLISM

- Substrate and Metal Specificity in the Enzymic Synthesis of Cyclic Monoterpenes from Geranyl and Neryl Pyrophosphate
M. Cecilia Rojas, Liliana Chayet, Gloria Portilla, and Osvaldo Cori 389
- Soybean Nodule Xanthine Dehydrogenase: A Kinetic Study
Michael J. Boland, Dale G. Blevins, and Douglas D. Randall 435
- Glucose-6-phosphate Dehydrogenase from *Leuconostoc mesenteroides*: Revised Kinetic Mechanism and Kinetics of ATP Inhibition
H. Richard Levy, Melody Christoff, Joann Ingulli, and Ellen M. L. Ho 473
- Purification and Properties of Transketolase from Fresh Rat Liver
Francesco Paoletti 489

HORMONE STRUCTURE AND FUNCTION

- Temperature-Dependent Inactivation of Nucleic Acid Binding and Aggregation of the 1,25-Dihydroxyvitamin D₃ Receptor
Renny T. Franceschi, Hector F. DeLuca, and Donna L. Mercado 504
- Isolation, Purification, and Characterization of Deer Mouse (*Peromyscus maniculatus bairdii*) Prolactin
Peter Colosi, Thomas A. Bewley, and Frank Talamantes 621

LIPIDS

- Characterization of Lecithin:Cholesterol Acyltransferase from Human Plasma: II. Physical Properties of the Enzyme
Kui-Song Chong, Shinichi Hara, Richard E. Thompson, and Andras G. Lacko 553

MEMBRANE STRUCTURE AND FUNCTION

- Proton Movement in Reconstituted Purple Membrane of *Halobacteria*: Effects of pH and Ionic Composition of the Medium
Fausto Ramirez, Hiroshi Okazaki, Shu-I Tu, and Howard Hutchinson 464
- The Relationship between the Osmotic Fragility of Human Erythrocytes and Cell Age
Joseph M. Rifkind, Koji Araki, and Evan C. Hadley 582
- Vitamin D-Mediated Alterations in the Topography of Intestinal Brush Border Proteins: Effect of Papain on Hydrolase Release and Calcium Uptake
Ilka Nemere, John A. Putkey, and Anthony W. Norman 610

OXYGENASES, MICROSOMES, AND P-450 REACTIONS

- Induction of 17 α -Hydroxylase (Cytochrome P-450_{17 α}) Activity by Adrenocorticotropin in Bovine Adrenocortical Cells Maintained in Monolayer Culture
John L. McCarthy, Robert E. Kramer, Bruria Funkenstein, Evan R. Simpson, and Michael R. Waterman 590

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

- Purification and Characterization of Glycolate Oxidase from Pumpkin Cotyledons
Mikio Nishimura, Yusuf D. Akhmedov, Kazimierz Strzalka, and Takashi Akazawa 397
- Lateral Mobility of the Light-Harvesting Complex in Chloroplast Membranes Controls Excitation Energy Distribution in Higher Plants
D. J. Kyle, L. A. Staehelin, and C. J. Arntzen 527
- Localization of Enzymes and Alkaloidal Metabolites in *Papaver* Latex
Margaret F. Roberts, David McCarthy, Toni M. Kutchan, and Carmine J. Coscia 599

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

- Effects of Thermodynamic Nonideality in Kinetic Studies
Lawrence W. Nichol, Michael J. Sculley, Larry D. Ward, and Donald J. Winzor 574

POLYSACCHARIDES AND COMPLEX CARBOHYDRATES

- Proteoglycan Changes During Restoration of Transparency in Corneal Scars
John R. Hassell, Charles Cintron, Claire Kublin, and David A. Newsome 362
- Identification of the Mannan-Binding Protein from Rat Livers as a Hepatocyte Protein Distinct from the Mannan Receptor on Sinusoidal Cells
Kazutoshi Mori, Toshisuke Kawasaki, and Ikuo Yamashina 542
- Oligosaccharides Released from Glycolipids by Trifluoroacetyolysis can be Analyzed by Gas Chromatography-Mass Spectrometry
Bo Nilsson and David Zopf 628

PROTEIN STRUCTURE, FUNCTION, AND TURNOVER

- An Exploration of the Primary Specificity Site of Cathepsin B
Elliott Shaw, Peter Wikstrom, and John Ruscica 424
- Binding of Terbium to Apoferritin: A Fluorescence Study
Simonetta Stefanini, Emilia Chiancone, Eraldo Antonini, and Alessandro Finazzi-Agro 430
- Laminin from Rat Yolk Sac Tumor: Isolation, Partial Characterization, and Comparison with Mouse Laminin
Eva Engvall, Tom Krusius, Ulla Wewer, and Erkki Ruoslahti 649

REGULATION OF METABOLISM AND OF ENZYME ACTION

- The Action of Vasopressin and Calcium on Palmitate Metabolism in Hepatocytes and Isolated Mitochondria from Rat Liver
Ingunn Almås, Balbir Singh, and Borgar Borrebaek 370
- The Subcellular Localization of Calmodulin, Cyclic AMP Phosphodiesterase, and Adenylate Cyclase in Bovine Adrenal Medulla
Jane G. Tirrell and Carole J. Coffee 380

Peroxisomal and Mitochondrial Palmitoyl Coenzyme A β -Oxidation Activities in Rat White Adipose Tissue and Their Regulation in Hypothyroidism	<i>Sylvette Bas and Jean-Paul Giacobino</i>	416
CO ₂ Metabolism in the Liver	<i>Robert Rognstad</i>	442
Ligand-Induced Interconversions of Maize Homoserine Dehydrogenase among Different States	<i>Sriram Krishnaswamy and John K. Bryan</i>	449
Phosphorylation Site Specificities of Glycogen Synthase Kinases: Determination by Peptide Mapping Using High-Performance Liquid Chromatography	<i>Henning Juhl, Virender S. Sheorain, Charles M. Schworer, Mary Frances Jett, and Thomas R. Soderling</i>	518
Trehalase from the Cellular Slime Mold <i>Dictyostelium discoideum</i> : Purification and Characterization of the Homogeneous Enzyme from Myxamoebae	<i>Kathleen A. Killick</i>	561
AUTHOR INDEX FOR VOLUME 222		661

The Subject Index for Volume 222 will appear in the December 1983 issue as part of a cumulative index for the year 1983.

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. Manuscripts are welcome that contain new and significant information of general interest to workers in these fields. Sufficient detail must be included to enable others to repeat the work.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in triplicate (one original and two photocopies), including three sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. Contributors will receive decision letters from the Executive Editor. Resubmitted manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1969. Please note the following examples.

1. JONES, J. B., DILWORTH, G. L., AND STADTMAN, T. C. (1979) *Arch. Biochem. Biophys.* **195**, 255-260.
2. METZLER, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. HARRINGTON, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246-409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
